悠游天下，回归宁静内心

The Resort to Heart

项目名称: Marifield住宅
设计师: 梅德设计组

Project Name: Marifield
Designer: Meade Design Group

This home was inhabited by a busy family of travelers. Meade Design Group wanted to achieve a look that was effortless yet sleek, refined, warm and comfortable to match their easy-going but sophisticated personality and lifestyle.

This was achieved by utilizing combinations of rich tones of sepia, burnt orange and charcoal in a range of textures and patterns to form a warmly layered, lived-in ambiance. The custom-designed fireplace (which draws inspiration from the fabric used on the open-backed chairs) emphasizes the height and creates an interesting focal point, counter-balanced by the commissioned art piece hung above the sofa.

The designers were eager to include the client's own treasured pieces, such as their grandfather's leather chair and the family's beloved baby grand piano, juxtaposing them with modern classics such as the Platner coffee table, vintage-styled lamps, and contemporary accessories.

The living room's grand wall of windows was given special presence with the use of full-height silk draperies, with a custom horizontal band detail which really ties the colour scheme together. The draperies also serve a second purpose, they visually stretch the window to appear wall-to-wall, even though the glass does not extend fully to the right side, giving a luxurious and symmetrical appearance.
